## SUMMARY

Full-Stack Developer specializing in building high-performance, scalable web applications. Proficient in architecting robust backend systems with ASP.NET Core and SQL Server, and crafting modern, SEO-optimized frontends using Next.js, React, and TypeScript. Experienced in enhancing system efficiency through Redis caching and RabbitMQ messaging. Currently refining advanced full-stack capabilities at ITI and contributing to IEEE backend infrastructures. Committed to Clean Architecture and SOLID principles to deliver type-safe and maintainable code.

## TECHNICAL SKILLS

- Frontend: Next.js (App Router), React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Redux Toolkit.
- Backend: C#, .NET 8/7, ASP.NET Core (Web API & MVC), Entity Framework Core, SQL Server.
- Architecture: Clean Architecture, Repository Pattern, Unit of Work, SOLID Principles, RESTful APIs.
- Tools & Performance: Redis Caching, RabbitMQ, JWT Auth, Git/GitHub, Postman, Swagger.

## PROJECTS & EXPERIENCE

### Information Technology Institute (ITI) | Full Stack .NET Trainee | Oct 2025 – Present

- E-Commerce Platform: Engineered a high-performance backend using ASP.NET Core Web API, focusing on scalable architectural patterns.
- Performance Optimization: Reduced database load by 40% through strategic implementation of Redis Caching.
- System Scalability: Integrated RabbitMQ for asynchronous task execution, significantly improving request processing efficiency.
- Data Design: Architected normalized SQL Server schemas ensuring data integrity and optimizing complex query performance.

### IEEE Beni-Suef Branch (EcoBridge Project) | Backend Team Lead | 2026 – Present

- Cross-Border Collaboration: Led the backend team in a collaborative development effort with the IEEE Tunisia Section to deliver a unified web platform.
- Security & Identity: Architected a robust Authentication & Authorization system using JWT and ASP.NET Identity, ensuring secure access control.
- Database Management: Designed and managed the core database infrastructure, ensuring high availability and data consistency across features.
- Web Security: Implemented security best practices (CORS, Data Protection, and Input Validation) to safeguard against common vulnerabilities.

## EDUCATION

Expected2028

FacultyofNavigationScienceandSpaceTechnology  
*Bachelor of Science (B.Sc.)*

- Third-Year Student (Focus on Mathematical Modeling and Logical Design).

## CERTIFICATIONS

- Full Stack .NET Development Training – ITI
- Next.js & React Modern Web Development – Udemy
- Full Stack .NET Development – Udemy

## LANGUAGES

- Arabic
- English
